## About Karen

Karen brings with her an international living experience, having resided in both the USA and the UK before making her move to Brisbane 16 years ago.

This experience, which has enriched her understanding of the relocation process, along with her love for showing people around the city and helping to make the property search less stressful, makes her a helpful and understanding guide for those on a similar journey.

When asked about her top tips for anyone moving to Australia, she replied, "Allow yourself time to explore. Brisbane, for example, has many different areas and suburbs with something to suit everyone," she added.

She also highly recommends using your relocation consultant if you have one and don't be afraid of asking 'too many questions'!
